Tiretherm 350

Tire warmer

Stress-free reduction of assembly - and disassembly - power of up to 50 %
Easy to operate thanks to characteristic control
Simply enter tire temperature
Fast and risk free accomplishment of core tire temperature from 24°C-27°C using the patent registered system

Fast amortization due to short and damage free mounting of UHP and RunFlat tires
Time saving through faster mounting of the warmed up tires
Easy to operate. Simply set up and load
connected value: 230V/16A

Fast heating for careful installation of UHP and Run Flat tires, according WdK Directive.

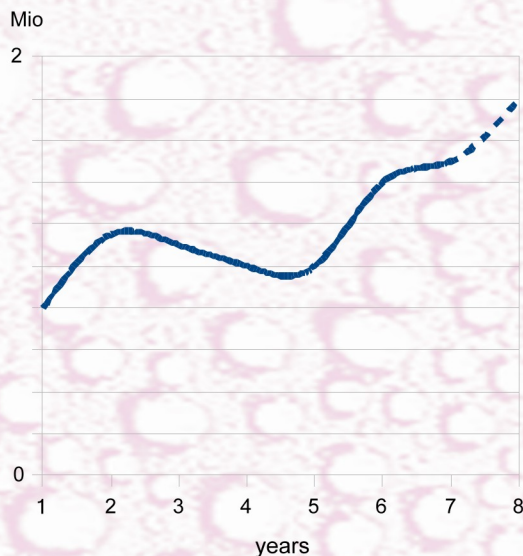

Tiretherm 350

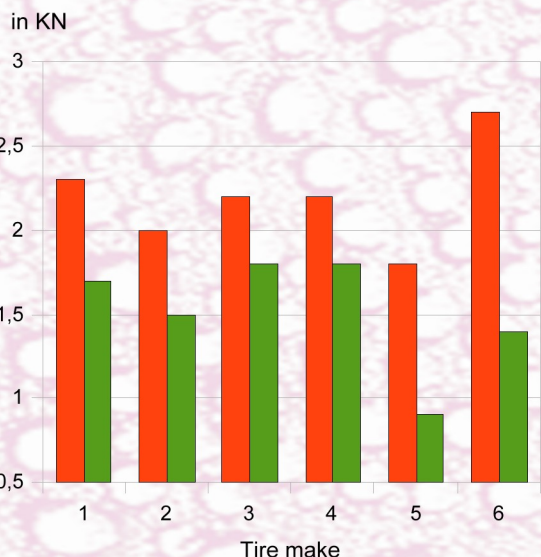

The Tire Warmer for your tires and wheels

The Ultra High Performance (UHP) tires and the wheels with emergency running properties (RunFlat) have been accepted by the market and according to BRV have a 25% share of the tire replacement business.

Development of runflat tyres for passenger cars in the last 7 years

The graphic shows the results of a study by DEKRA, MPA and WdK. The decrease of mounting power in kN after the heating of the tires from 21°C (red bar) to 25°C (green bar) was determined up to 50%.

Technical data:

Size (LxWxH)	970 x 910 x 920mm
Weight	70kg
Max. wheel diameter	22"
Electrical supply data	230V / 50Hz
Heating power	3,5KW

We reserve the right to make technical modifications
